OUR PACKAGING – SECURE PROTECTION FOR YOUR PRODUCTS

Packaging today is much more than a simple wrapping or the look of your product. It is a philosophy that may define your brand’s success. Many people wonder: “How can I make my product attractive, while preserving its original qualities?” We at Formacia know the answer. We have been producing and supplying high-quality single-use packaging for major industrial and commercial enterprises in Russia and abroad since 2007.

Our production meets global standards of quality and environmental safety and sustainability, as part of our social responsibility policy.

Being fashionable means choosing our products and staying in harmony with nature while living in modern society.

FACTS AND FIGURES

FORMACIA – manufacturing company from Russia with its own warehouse in Europe.

We are leading company in the production and sale of disposable food packaging: paper cups, aluminium foil trays and paper baking moulds in Russian market.

Our partners are the biggest airlines, retail chains, bakery and meat processing plants. We provide our customers professional service and high quality of products.

13 years on the market
In-house production and printing facilities
Europian raw materials
Regulation (EC) compliance
250 professionals in our team

500 different items in the product range
More than 2000 companies as satisfied clients
3 offices and warehouses: Saint-Petersburg, Moscow and Riga
10000 sq. m. of warehouse and production facilities
WIP proprietary web-portal about packaging

TODAY FORMACIA PLAN CAPACITY IS:

20 million paper moulds a year
150 million aluminum trays a year
800 million paper cups a year
EASY TASTY
ECO-FRIENDLY
Paper cups are a great choice for both hot and cold drinks. They are made using single- and double-sided lamination techniques. You can choose extras for any type of paper cup — cardboard sleeves, stirrers and lids are all to be found in our catalogue.

**High Quality**
Durable
Made from quality high-density European cardboard, they hold their shape and will not leak or burn your hands.

**Eco-friendly**
Safe for humans and the environment, recyclable

**In-house printing facilities**
Modern wide-format equipment meeting top quality standards and the latest market tendencies

**Stylish Design**
Cups with a recognizable, patented design always in stock

**Wide Product Range**

---

Our products pass quality control at every stage, from design to production.

The paper cup industry is subject to trends and innovations like any other, and we know how to deliver a high-quality product that satisfies the client, making their brand stand out.
PAPER CUPS TODAY ARE AN ENTIRE SERVING CONCEPT, A PART OF A TRADEMARK STYLE AND THE 21ST CENTURY LIFESTYLE
THE TASTE QUALITY SERIES HAS ALREADY BECOME A FAVORITE OF MANY:

it has a simple yet attractive design, with each size coming in its own color scheme.

The technologies we use and designs we develop are in keeping with the latest industry trends. But we go beyond that by introducing our own unique solutions such as thermal ink printing, 3D textures, cut-out patterns and many other design elements.

All you have to do is choose!

Every customer has their own paper cup design preferences: it might be for a single color, multiple colors or patterns.

We are one of the few companies on the Russian market with in-house printing facilities. This means our paper cups will always match your design and the Pantone color scheme 100%.
VENDING

We produce all types and sizes of paper cups for vending machines. Our products meet the strictest requirements of this market.

- **PERFECTLY SERVED**
  Our cups do not get stuck and separate well.

- **IDEAL CONSTRUCTION**
  Our cups are tough and do not leak or deform.

- **THE RIGHT SIZE**
  Our range includes cups for European machines (ø 70 mm), Asian machines (ø 73 mm) and Vending-to-Go (ø 80 mm).

- **RECOGNIZABLE**
  A wide selection of off-the-shelf designs.
At your request, we can print colorful patterns or your logo on any vending cup. Our advanced in-house facility is capable of printing up to 5 colors, making your products really stand out from their competitors. You can order your own design or choose one of our ready-made solutions.
NATURE QUALITY

PAPER CUP IS:

INNOVATIVE WATER-DISPERSIBLE COATING
no PE layers

EFFECTIVE RECYCLING
used cups may be recycled up to 7 times

FOOD-GRADE WATER SOLUBLE INKS
odorless and safe

LEAK-PROOF
on par with usual, PE-coated cups

FOOD SAFETY
confirmed by European studies

LOW ECOLOGICAL FOOTPRINT
the technology ensures lower air pollution levels and power and water conservation

100% DECOMPOSED
100% PROCESSED
98% RENEWABLE
This collection is a favorite among organizations focused on child development and mental arithmetic, as well as private establishments and pre-school centers.
RANGE OF PAPER CUPS

TOTAL BLACK

WHICH ARE PERFORMED
WITH USAGE OF BLACK PE COATING.
THE INSIDE SURFACE OF CARDBOARD
IS COVERED BY LIQUID-PROOF PE LAYER,
THAT IS ABSOLUTELY SAFE FOR
HEALTH OF CONSUMERS.

MENTIONED TECHNOLOGY
PROVIDES THE POSSIBILITY
TO CREATE BRIGHT
AND UNIQUE DESIGNS
Single-wall paper cups are made using single- or double-sided lamination, using thermal processing technology on the laminated layer. This allows seams to be sealed without glue, while lamination prevents leaking and soaking.

DOUBLE-WALL PAPER CUPS

The main advantage of double-walls paper cups is the internal layer between walls which provides excellent heat insulation, allowing drinks to be held safely while retaining their temperature. The internal dimensions of double-walls cups are identical to their single-wall analogs.

COLOR-CHANGING CUPS

Thermal ink causes parts of the cup (such as the logo or writing) to change color when a hot drink is poured in.

3D TEXTURE PAPER CUPS

Hot stamping technology creates pressed-in elements and patterns on your cups, creating an unrivalled tactile experience.

SOFT-TOUCH COATING

The coating is elastic and matte, velvet and soft to the touch. The coating provides an anti-slip effect and it’s possible to apply it upon any design.

ADD A COLORFUL BOTTOM TO YOUR CUP

A design printed on the bottom of a cup is a striking and memorable feature that will attract your customer’s attention and ensure full interaction with your trademark.

TEAR-OFF COUPON

The new tear-off coupon technology creates customer-product interaction.

Coupons can be used for promos and contests.
EASY TASTY ECO-FRIENDLY
Aluminium foil is one of the modern world’s most popular materials. It is safe for people and environment, easy to process and recycle, and it keeps the products it is used to package fresh for longer.

Aluminium produces no harmful toxins and does not react with food. It is also very lightweight, easy to use, and its resistance to high temperatures makes it unique. Aluminium trays are commonly used both in the home and for industrial purposes.

**KEEP PRODUCTS FRESH**
Foodstuffs kept in aluminium packaging won’t dry out, sweat, lose their taste and aroma, or absorb strange smells.

**ECO-FRIENDLY**
Recyclable. Does not release harmful substances into food.

**EASY TO USE**
Microwave and oven safe. Tested and approved.

**CONVENIENT**
Preparation, transportation, storage, freezing, serving, and heating food.

**WIDE RANGE OF TEMPERATURES**
Can be used from -40°C to +280°C.
Wrinklewall foil trays are the most popular and recognizable type of aluminium food trays. Convenient, lightweight, and practical, they quickly became widely used in the fast food industry, food delivery services, the restaurant business, and for food production and culinary purposes. If necessary, trays can be closed with an aluminium, plastic, or cardboard-aluminium lid, which protects products from dust, wind, and other external factors.
Each tray has its own purpose. Even the smallest can make a significant contribution. In our range, you will find a wide selection of aluminium trays of different types and sizes; just choose the right one for you.

**PLASTIC LIDS FPL GROUP**

Flat plastic lids are ideal for those who need to show the product "face". Thanks to the special edge of the container, the lid is "pinched" into the side of the container with the L-side. They perfectly protect products from leaks during transportation, and allow you to stack closed containers on top of each other.

**PRODUCTION OF COVERS ACCORDING TO THE SIZE OF THE CUSTOMER.**
The minimum circulation is 25,000 pieces. Any shapes and sizes.
CARDBOARD-ALUMINUM LIDS

Certified for contact with food, the lids from cardboard and aluminium provide a tight fit and do not let water and grease inside, thus ensuring secure transportation and storage of your products. They are made from durable metal-coated material, which makes it possible for you to stack containers in several rows without the risk of crushing them.

An individually designed seal on the cardboard-aluminium lid can become the first step to increase your brand recognition.

**WHITE LIDS**
A variety of shapes and sizes.
Always in stock

**LIDS WITH CLIENT’S SIZE**
Minimum order – 20 000 pcs.
Any shape and size

**PRIVATE LABEL LIDS**
Minimum order – 30 000 pcs.
Flexoprint in our own printing facility
The client can request prints on lids or trays. We offer a complex supply of packages for in-flight meals of our own production.
Foil trays are a separate type of aluminium foil casserole. They are used by catering companies for serving food to airplane and train passengers and crews, as well as in schools, hospitals, factories, etc. Foil avia-casserole provide long-term storage of ready-to-eat food. They are resistant to different temperatures, making them convenient and safe to use in microwave ovens and convection heaters, as well as for deep freezing.
EASY TASTY ECO-FRIENDLY
• Tulip Muffin Wraps
• Parchment Paper Moulds
• Laminated Paper Moulds
• Private Label Paper Moulds
Disposable paper moulds are ideal both for baking and for transporting and selling the final product. The secret of their multifunctionality is the material from which they are made — greaseproof and moisture-resistant high-density paper that provides excellent heat resistance, which preserves their original shape even at high temperatures.

OPTIMAL BAKING
Bakes evenly on all sides

NO NEED TO GREASE
Saves time and money

FUNCTIONS IN A WIDE RANGE OF TEMPERATURES
Can be used at temperatures from −40°C to +220°C

GREASE AND MOISTURE RESISTANT
The moulds have a special coating which is grease and water resistant

STYLISH DESIGN AND A WIDE RANGE OF SIZES
Moulds can be custom designed

ECO-FRIENDLY
Non-toxic and recyclable
This type of mould is ideal for baking tarts, pies, pizzas, gingerbread. The silicone layer ensures easy removal of the product from the mould, while the parchment does not let grease and moisture in.
Laminated paper moulds are made from cardboard covered in a special coating, creating a grease and moisture resistant layer. The moulds are perfect for coffee cakes and rolls from batter or greasy dough.
We produce and supply paper moulds with our client’s design and brand logos. Our own printing house makes our ready-to-use solutions possible: from creating a layout to the final product. At the client’s request, moulds can be completed with transparent lids.

EASY TASTY
ECO-FRIENDLY
FOODINNI is a modern solution for every kitchen. Disposable kitchenware is just what you need for festivals, buffets and receptions: it allows you to save time and relax.

Our products are resistant to high and low temperatures and are microwave and oven safe. Some moulds come with lids — great to transport and store your food.
WHY CUSTOMERS CHOOSE FOODINNI:

- No need to wash
- No need to grease
- Easy to transport
- Can be used to freeze vegetables, mushrooms, and berries
- Microwave oven safety
- Temperature resistant from -40 to +220
- Ideal for cooking
- Food can be served directly in moulds or trays
- Compact
Disposable paper moulds make cooking and baking faster and easier. Their special coating means they do not require greasing. Your pies, muffins and rolls won’t stick to the mold, while baking evenly and holding their shape.
